6th June, 2019

To whom it may concern:

Dear Sir/Ma,

Space in Africa confirms that our annual report titled "African Space Industry Annual Report, 2019 Edition" is a unique product produced and distributed only by Ideal Space Technologies Limited. This is the first edition of our African Space Industry Annual Report which examines space activities, institutions, and trends in the African space industry from 1998 to May 2019 based on data gathered from government space agencies, academic institutions, NewSpace companies, and other space institutions, using both published data and interviews.

The extensive report is both a comprehensive guide to the newcomer to the industry and a treasure trove of information for anyone committed to having a stake in the multibillion-dollar industry. To the best of our knowledge, there do not currently exist other research reports containing the identical industry analysis and forecasts as found in these specific reports. This report was produced by Ideal Space Technologies Limited and no other company may lay claim to the copyright of this report. Ideal Space Technologies Limited own the full copyright to this report while the report is licensed to interested institutions for a fee.

Sincerely,

A handwritten signature in blue ink, appearing to read "Temidayo Oniosun".

Temidayo Oniosun
Managing Director
